

DAN deflectors

DAN deflectors

Eight available deflectors which determine the spray pattern. Suitable for modular DAN sprinklers with bridge.

Red (180°) narrow

- ✓ Single-sided, smooth, small deflector, is used as a edge sprinkler for irrigation with DAN-8991 / DAN Bridgeless
- ✓ Up to 45 l/h sprinklers
- ✓ Range sufficient for sprinklers up to 1.5 meters, as well as sprinklers up to 2 meters

Red (180°) standard

- ✓ Single-sided, ribbed, large deflector, is used as an edge sprinkler for irrigation with DAN-8991 / DAN Bridgeless
- ✓ From 70 l/h sprinklers
- ✓ Range sufficient for sprinklers up to 1.5 meters, as well as sprinklers up to 2 meters

Black (90°)

- ✓ Angled deflector for small surfaces and in garden irrigation
- ✓ Can be installed upright (for garden irrigation)

Orange (360°)

- ✓ Provides a narrow conical spray pattern
- ✓ Very small range up to approx. 1.0 meter
- ✓ Installed upright, can be used between (cherry) trees to irrigate the soil while keeping the tree trunk dry

Yellow (360°)

- ✓ Round deflector with small range (up to 3 meters diameter)
- ✓ Is used in greenhouses above panels, with and without anti-mist element
- ✓ Can be installed upright (for garden irrigation)

Violet (mist)

- ✓ Mist deflector for fine sprays
- ✓ In combination with violet and brown nozzle
- ✓ Range up to 1.8 meters, 360°

Blue (strip)

- ✓ Gives an elongated spray pattern
- ✓ Is used for under-tree irrigation
- ✓ Range from 3.2 to 9 meters, depending on flow rate

Green (12-S)

- ✓ Gives 12 jets over 360° as spray pattern
- ✓ Range from 2.5 to 6 meters, depending on flow rate
