

Alu-rail

Alu-rail is a combined aluminium-polyethylene suspension system as an alternative for PVC sprinkler pipes and/or PE hoses on wire systems. The aluminium rail allows larger spans so that the use of tension wire and wire hooks can be avoided.

APPLICATION

Cattle breeding, industry and plumbing for the installation of PE or other pipe systems, indoors or outdoors

CHARACTERISTICS

- ✓ Suspension with chain, wire, 'upright' or 'horizontal' or 'upside down'
- ✓ Also suitable for suspending hanging plants
- ✓ Connect using special connectors: suspension eyelets are available for any method of installation

TECHNICAL DATA

Dimensions	: 16, 20, 25, 32 mm
Length	: 5 meters
Span	: 3.0-3.5 meters or with V suspension for larger spans and extra weight (hanging plants)
Material	: aluminium (rail and connectors)
