

# PVC sprinkler pipe (white/black)

A special sprinkler pipe is the white sprinkler pipe for the installation of greenhouse sprinklers.

The standard length of 6.04 meters was chosen so that all common drilling distances fit: 50, 75, 100, 150, 200, and 300 cm. An additional advantage: compared to the 4.54-meter length, the 6.04-meter length has 33% fewer glue joints. This saves labor time and reduces the risk of leakage and misalignment during gluing.

## APPLICATION

Overhead irrigation using standard lengths, available on a project basis

## CHARACTERISTICS

- ✓ Pre-drilled 3/8" BSP threaded holes for irrigation sprinklers in Ø 32 and 40 mm at 50, 75, 100, 150, 200 and/or 300 cm.
- ✓ Custom drilling distances and lengths available on request.
- ✓ Pipe with the first drilled hole positioned 10 cm from the spigot end.
- ✓ High-quality control with specific attention to leak-free connections with sprinklers.

## TECHNICAL DATA

Diameter and pressure	: Ø 32 mm 10 bar
	: Ø 40 mm 7.5 bar
Length	: 6.04 m
Wall thickness	: 1.9 mm
Connection	: integrally molded glue socket
Color	: white (RAL 9010, off-white)
Imprint	: Omniplast
