

Pro-C Controller

Hunter

The Hunter PRO-C irrigation controller is a professional multi-purpose controller with a user friendly interface. This controller is mainly used in landscaping and garden irrigation. Default the PRO-C controller is equipped with 4 digital outputs and is expandable with expansion modules, creating a maximum of 16 outputs.

APPLICATION

Landscaping, riding arena irrigation

CHARACTERISTICS

- ✓ Easy control
- ✓ 3 programs, 4 time starts, total of 12 time starts
1 minute intervals on time sets of 0-6h
- ✓ Weekdays or date interval
- ✓ Delay settings for valve opening and closing
- ✓ Easy runtime control from 10-150%
- ✓ Memory safe at power failure
- ✓ Multiple Hunter sensor inputs
- ✓ Pump start and main valve control
- ✓ Polymer lockable housing on outdoor series with on-board power supply
- ✓ Normal cover on indoor series and external power supply
- ✓ Battery power for external programming and memory safe during power failures

TECHNICAL DATA

Power supply	: 230VAC ±10% 50/60 Hz
Transformer output	: 24VAC 1A
Norm	: CE
Battery*	: 9 Volt (not included)

* for external programming only

Valve outputs

Amount	: 4, 7, 10, 13 or 16 valves
Max. output	: 0,56A per output
Max. output	: 0,84A including pump start/main valve

Dimensions

Indoor series	: 22,9 x 25,4 x 11,4 cm (HxWxD)
Outdoor series	: 22,9 x 25,4 x 11,4 cm (HxWxD)

Expansion modules

Module 3	: 4 to 7, 7 to 10, 10 to 13 outputs
Module 9	: 7 to 16 outputs(only)

Indoor series

Outdoor series (onboard power supply)

Expansion module
