

# Swivel fittings

Tavlit

Swivel fittings are couplers with nut that allow connections to be made and disconnected quickly and easily.

## APPLICATION

Irrigation systems (indoor and outdoor)

## CHARACTERISTICS

- ✓ Available as coupling, T-piece or cross-over
- ✓ Also available with a Nutlock connection (16 - 20 mm)
- ✓ Simple repair, replacement and temporary removal of valves, filters and water meters
- ✓ Available with male and female thread

## TECHNICAL DATA

Connection	: ½" - 2" BSPT (male and female thread)
Maximum pressure	: 8 bar (at 20 °C)
Nominal pressure	: 6 bar
Material	: polypropylene (housing and nut) : EPDM (seal)

## INSTALLATION & MAINTENANCE

- ✓ Sealing by means of swivel fittings without the use of tape or other sealing material is possible within the PP self-seal package from Tavlit, and with many other fittings and materials. If the desired combination is unknown, prepare a test piece to test the seal.
- ✓ The parts can be easily turned after installation without leakage occurring.
