

# DAN-7955 Mist Sprinkler

As an intermediate form between rotating sprinklers and foggers as far as the droplet size is concerned, the DAN-7955 Mist Sprinkler has been specially developed for very fine irrigation of young plants and/or larger cuttings.

## CHARACTERISTICS

- ✓ Intermediate form between rotating sprinklers and foggers
- ✓ For very fine irrigation of young plants and/or larger cuttings
- ✓ Optimum sprinkler spacing 1x1.6 m
- ✓ Note: Mist droplets can drift upwards

## TECHNICAL DATA

Nozzle	Pressure (bar)	Flow rate (l/h)	Wet area (m) after 12 sec.	Wet area (m) after 120 sec.
Violet	1,0	25	1,3	1,6
	1,5	31	1,4	1,7
	2,0	35	1,5	1,8
	2,5	39	1,6	2,2
	3,0	43	1,7	2,6
